

Tri-State Radio Hams To Meet In Owensboro 1948

Some 125 members of the local Tri-State Amateur Radio Society are expected to take in the Mid-Winter Ham Reunion Sunday afternoon at Owensboro.

The event has been planned by the Electronics Division of General Electric, Owensboro Radio Club, and the TARS program committee.

Amateurs will meet at the GE Tube Works in Owensboro at 1 p. m. for a plant tour.

Open Forum

At the Darnek Club an open forum will be led by "Lighthouse Larry," W2RVT, editor of GE Ham News.

Darnek Club has grounds where the hams may set up their portable transmitters.

Some plan mobile sets operating in their cars on the trip over and back.

First of Kind

Al Schoettlin, W9UMS, chairman of the TARS program committee, said this is the first event of its kind staged in the midwest.

Clifford C. McGuyer, W9DGA, TARS secretary, has made reservations for the TARS delegation. He said it will include about 25 Evansville College engineering students, about 25 local radio servicemen and other hams from Evansville, southern Indiana, southern Illinois and northwestern Kentucky.
